PROFESSIONAL SUMMARY

Data and Reporting Analyst with 8+ years of experience across business intelligence, data analysis, reporting automation, data engineering, and systems delivery in aged care, finance, logistics, and technology. Advanced capability in Power BI, SQL, DAX, SSRS, Excel, Python, ETL, data modelling, KPI reporting, data quality, and data governance. Proven record of reducing a seven-day process to 10 seconds, migrating 3,000+ records with 100% data integrity, cutting month-end reconciliation time by 30%, and supporting compliant billing for 7,000+ residents. Translate complex operational and financial data into accurate, audit-ready reports, actionable insights, and clear recommendations for technical and non-technical stakeholders.

TECHNICAL SKILLS

- **Business Intelligence & Reporting:** Power BI, DAX, SSRS, Excel, dashboard development, KPI reporting, financial reporting, operational reporting, compliance reporting, data visualisation, data storytelling
- **Data Analysis:** SQL, data extraction, data cleansing, data validation, reconciliation, trend analysis, forecasting, statistical analysis, regression, classification, time-series forecasting, root-cause analysis
- **Data Engineering & Databases:** ETL pipelines, SSIS, Python, pandas, NumPy, data modelling, data migration, data quality, data governance, SQL Server, Snowflake, PostgreSQL, MySQL
- **Systems & Delivery:** Procura, PRODA, CIM, eCase, Epicor, Oracle MyHR, MediMap, RiskMan, requirements gathering, stakeholder engagement, Agile delivery, process improvement, cross-functional collaboration, technical documentation, Git

PROFESSIONAL EXPERIENCE

IT Data Analyst (Part-time)

May 2026 - Present

Helping Hand Aged Care

Adelaide, SA

- Build and maintain Power BI dashboards and SQL Server Reporting Services reports for finance, operations, and compliance stakeholders, converting reporting requirements into reliable KPI insights.
- Automated a weekly Python ETL workflow, reducing execution time from seven days to 10 seconds while eliminating manual errors and improving reporting timeliness.
- Led the migration of 3,000+ residential care records from eCase to Epicor, completing extraction, transformation, reconciliation, validation, and quality assurance with 100% data integrity.
- Extract, cleanse, reconcile, and analyse data from RiskMan, MediMap, Oracle MyHR, eCase, Epicor, and Procura to strengthen data quality, governance, and audit-ready reporting.

Accounts Receivable - Finance (Part-time)

Sep 2025 - Present

Helping Hand Aged Care

Adelaide, SA

- Manage billing operations for 7,000+ residents through Procura and PRODA, maintaining compliance with government fee schedules and accurate, audit-ready financial records.
- Analyse accounts receivable data in Excel and Power BI, monitor KPIs, investigate variances, and deliver weekly process-improvement reporting to the Finance Manager.
- Built a Python solution that generates compliant Home Care statements and resolved a workflow bottleneck, reducing processing delays by 15%.
- Applied root-cause analysis and systematic data-quality controls, reducing receivables errors by 40% and improving billing accuracy.

Acting Rostering Officer & Accounts Officer

Dec 2023 - Aug 2025

Greek Orthodox Community of South Australia

Adelaide, SA

- Managed rosters for 150+ staff across four care houses in CIM, maintaining Fair Work compliance, accurate workforce data, and continuity of care.
- Developed Power BI dashboards for monthly invoicing, anomaly detection, financial analysis, and management reporting.
- Redesigned reconciliation workflows and automated reporting, reducing month-end processing time by 30% across 12 billing cycles.

ICT Systems Developer

Mar 2022 - Jan 2023

Gaaubesi Logistics Pvt. Ltd.

Kathmandu, Nepal

- Built a Django, Python, and REST API-based HR management system for 200+ employees, reducing administration overhead by 50%.
- Developed real-time analytics dashboards and KPI reporting to support data-driven leadership decisions.
- Automated HR workflows and ETL pipelines, improving data accuracy, process efficiency, and reporting consistency across three departments.

Chief Technology Officer / ICT Systems Developer

Logispark Technology Pvt. Ltd.

Dec 2017 - Feb 2022

Kathmandu, Nepal

- Developed scalable ETL pipelines, backend applications, databases, and enterprise data solutions for 5+ clients, improving pipeline reliability by 35%.
- Applied predictive modelling, data analysis, and reporting automation to reduce client reporting turnaround by 25%.
- Promoted to CTO in January 2020 and led solution architecture, database design, deployment, stakeholder delivery, and technical documentation for Python-based systems.
- Mentored four junior developers and embedded code quality, testing, documentation, and data-governance practices.

Data Visualization Intern

Deerwalk Institute of Technology

Jun 2017 - Sep 2017

Sipal, Kathmandu, Nepal

- Interned in Deerwalk Institute of Technology's Research and Development unit under the supervision of Dr. Sunil Chaudhary.
- Engaged in research activities and served as a data collector for ongoing projects.
- Developed Django and Python applications, contributing to the institute's software development efforts.
- Gained valuable experience in research methodologies, data collection, and software development practices.
- Collaborated with a diverse team to support research initiatives and enhance technical skills.

EDUCATION

Master of Artificial Intelligence and Machine Learning

University of Adelaide

Jan 2023 – Mar 2025

Adelaide, SA | CGPA: 6.28/7

BSc Computer Science and Information Technology

DWIT College, Tribhuvan University

Nov 2015 – Dec 2019

Kathmandu, Nepal

CERTIFICATIONS

- Google Business Intelligence Professional Certificate - Coursera, 2025
- Oracle Fusion AI Agent Studio Certified Foundations Associate - 2025
- Oracle Fusion Cloud Applications HCM Process Essentials Certified, Release 1 - 2026
- Machine Learning and Artificial Intelligence - University of Adelaide, 2025

PROJECTS

Energy-use Forecasting | *LSTM, ConvLSTM, ARIMA, Random Forest, SVM*

Built and evaluated forecasting models for residential energy consumption using structured preprocessing, feature preparation, model comparison, and performance analysis.

Hotel Review Sentiment Analysis | *Python, VADER, SVM, NLP*

Led development and evaluation of a TripAdvisor sentiment-analysis model that achieved 94.47% accuracy and outperformed baseline models.

Production Hall Analytics | *Python, pandas, statistical visualisation*

Analysed relationships between production-hall gates and machine behaviour, applying statistical analysis and visualisation to identify operational patterns.

LEADERSHIP & COMMUNITY

Community Engagement Volunteer

Adelaide Nepal Association

Jan 2025 - Present

Adelaide, SA

- Coordinate cultural events, logistics, communications, and stakeholder collaboration for Adelaide's Nepalese community.

Programming Instructor

Deerwalk Education Group

Mar 2019 - Jan 2023

Nepal

- Instructed 200+ students in Python, C, C++, PHP, Django, programming fundamentals, and application development.

President

DWIT Social Service Club

Nov 2017 - Dec 2019

Kathmandu, Nepal

- Led community initiatives and coordinated activities involving more than 100 students.

AWARDS

Best Prototype - Everest Hack 2019 | Best Presentation - AsianHack 2019
